

NC IOM TASK FORCE ON CHRONIC KIDNEY DISEASE

May 30, 2007

NC Hospital Association

10:00-3:00

- (1) Reduce the occurrence of chronic kidney disease by controlling the most common risk factors, diabetes and hypertension, through preventive efforts at the community level and disease management efforts in the primary care setting.
- (2) Educate the public and health care professionals about the advantages and methods of early screening, diagnosis, and treatment of chronic kidney disease and its complications based on Kidney Disease Outcomes Quality Initiative Clinical Practice Guidelines for chronic kidney disease or other medically recognized clinical practice guidelines.
- (4) Make recommendations on the implementation of a cost-effective plan for prevention, early screening, diagnosis, and treatment of chronic kidney disease and its complications for the State's population.
- (5) Identify current barriers to adoption of best practices and potential policy options to address these barriers.
