Person in Environment

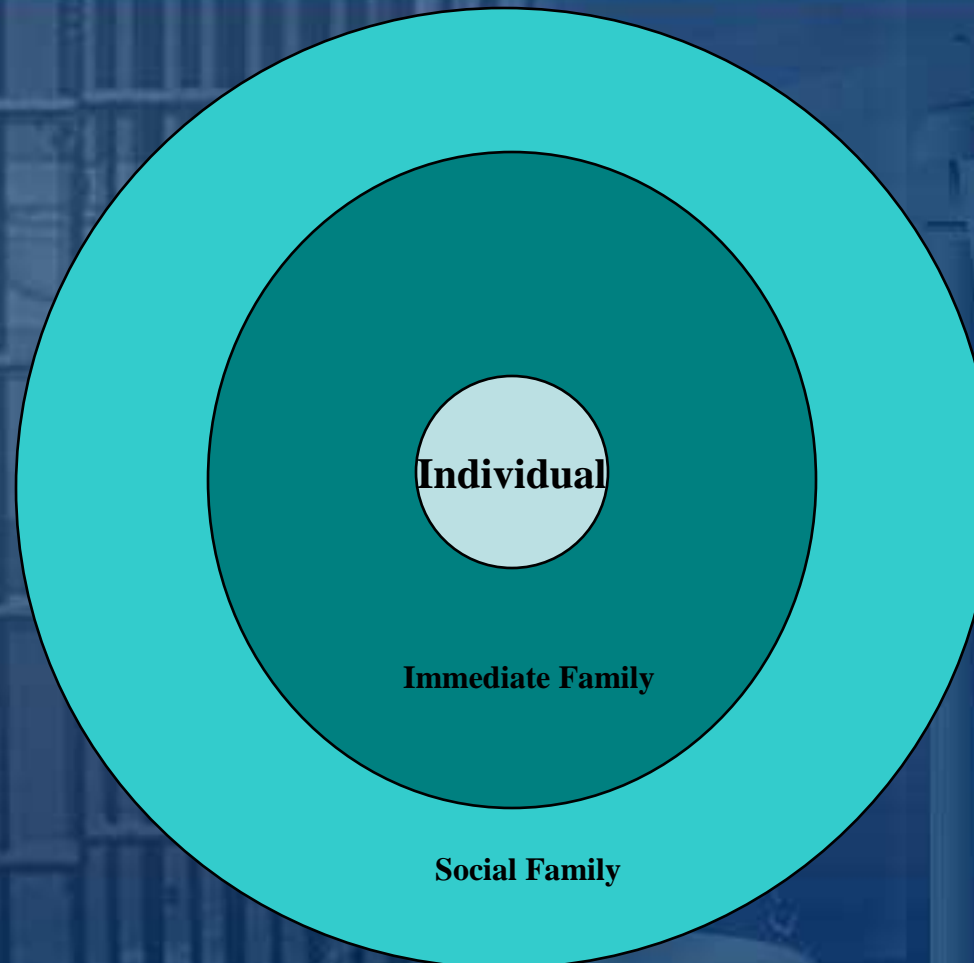

# ReEntry Planning Model

Immediate Family is defined as family of origin plus significant others, i.e.. spouse, life partner, children. These relationships are the most intense and are the most important for the success of the re-entry process. The individual interacts with the immediate family, the immediate family interacts with the individual and each interacts with the other components of the wheel, alone or in consort.

# ReEntry Planning Model

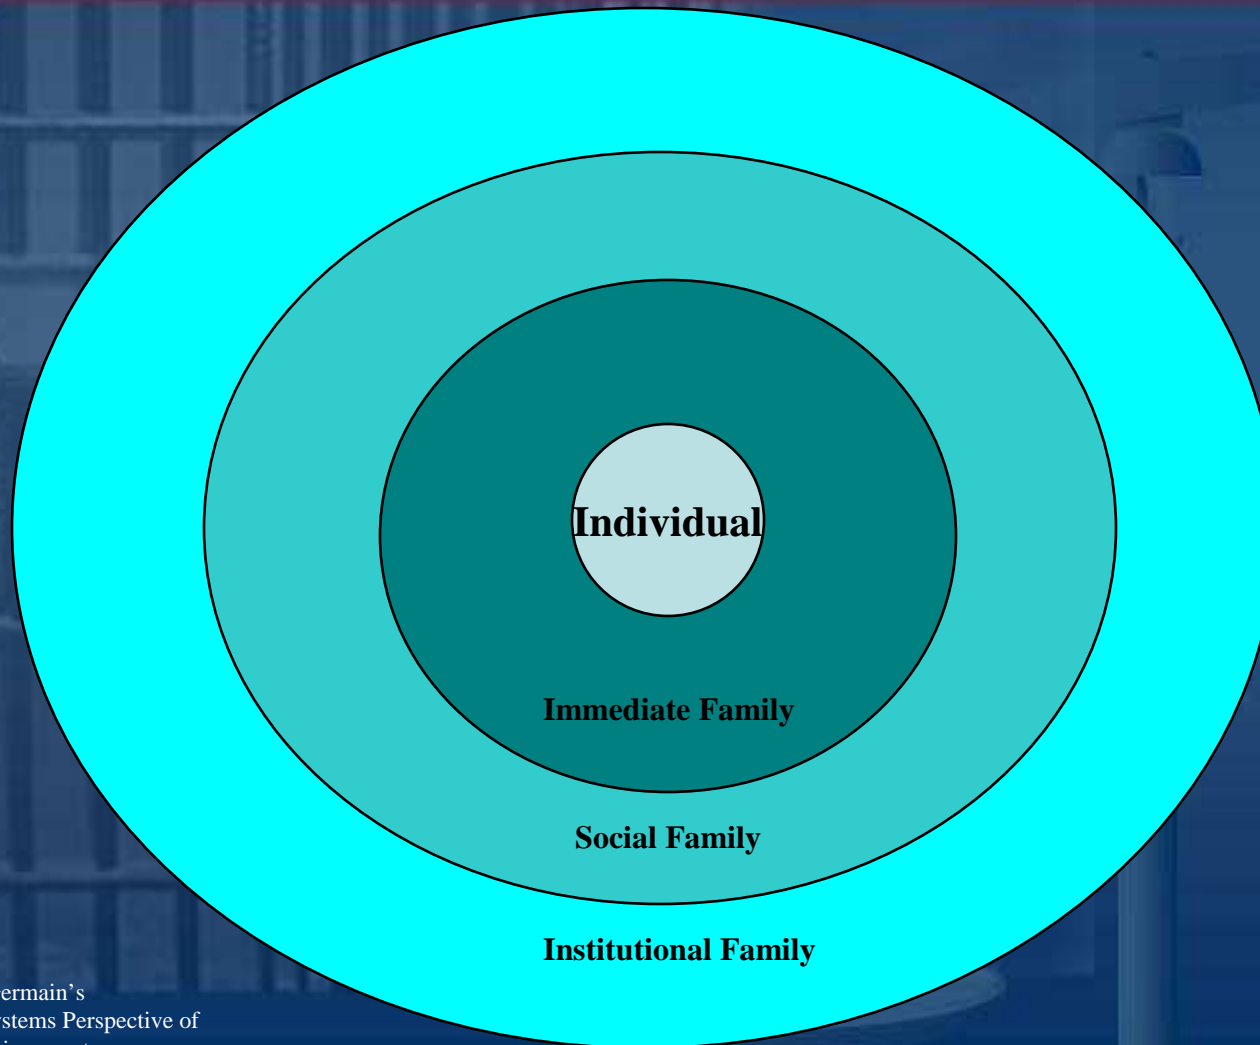

Social family is defined as those close relationships outside of the immediate family. These relationships could be friends from school, work, or church, or neighbors or extended family such as grandparents, aunts, uncles, and cousins. These relationships are less intense than immediate family relationships, however, they do occasionally replace the immediate family relationship.

From Carrel Germain's  
Ecological Systems Perspective of  
Person in Environment

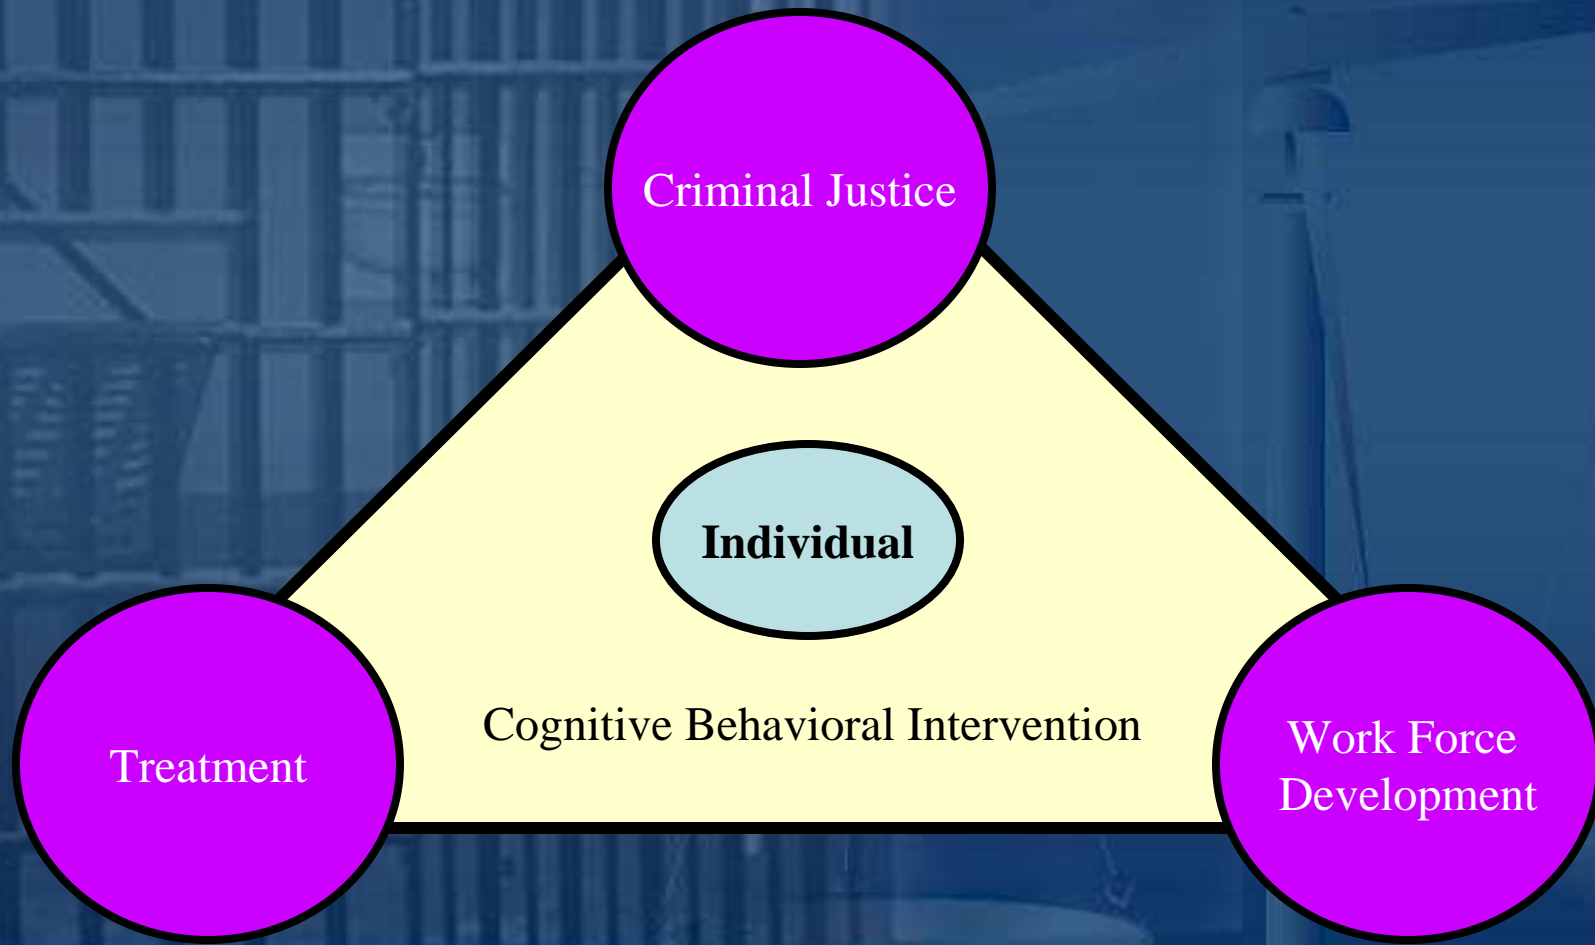

# ReEntry Planning Model

Institutional family is defined as those agencies which significantly impact the life of the individual. These agencies can act separately or in a collaborative, cohesive manner. These agencies address the needs of the individual taking into account the impact on the family as defined by the individual, the community and society.
